NOVELTIES

2023

B|Thin, cerámica de espesor fino.

Una gama de productos cerámicos que aúna las características de la cerámica tradicional y le aporta nuevas prestaciones. Piezas de un grosor de entre 6 mm y 8 mm. Modelos ligeros pero resistentes que permiten reducir los costes logísticos y trabajar directamente sobre material ya colocado, lo que los convierte en un recurso de un gran valor para arquitectos y diseñadores.

B|Thin, thin thickness ceramic.

A range of ceramic products that combines the characteristics of traditional ceramics and provides new benefits. Pieces between 6 mm and 8 mm thickness. Lightweight but resistant models that allow you to reduce logistics costs and work directly on already placed material, which makes them a resource of great value for architects and designers.

Un mayor espesor para grandes prestaciones

Baldocer presenta su gama B&out. Porcelánico espesorado con 20 mm de grosor que es perfecto para usar en exteriores gracias a sus excepcionales características técnicas. Su resistencia a impactos y a cambios de temperatura, su durabilidad y su acabado antideslizante lo convierten en la solución perfecta para jardines y terrazas, zonas industriales y entornos de agua como piscinas y zonas costeras.

Las colecciones de la gama B&out se inspiran en elementos naturales para encajar en cualquier espacio. Baldocer continúa ampliando la tipología de producto para alcanzar todas las necesidades más exigentes del mercado. Con estas colecciones, B&out permite hacer realidad cualquier proyecto.

Higher thickness for high performance

Baldocer presents its B&out range. Porcelain with 20 mm thickness that is perfect for outdoor use thanks to its exceptional technical characteristics. Its resistance to impacts and temperature changes, durability and non-slip finish make it the perfect solution for gardens and terraces, industrial areas and water environments such as swimming pools and coastal areas.

The collections of the B&out range are inspired by natural elements to fit into any space. Baldocer continues to expand the product typology to meet all the most demanding needs of the market. With these collections, B&out makes any project a reality.

B|Plus, una apuesta por el porcelánico de gran formato y espesor fino.

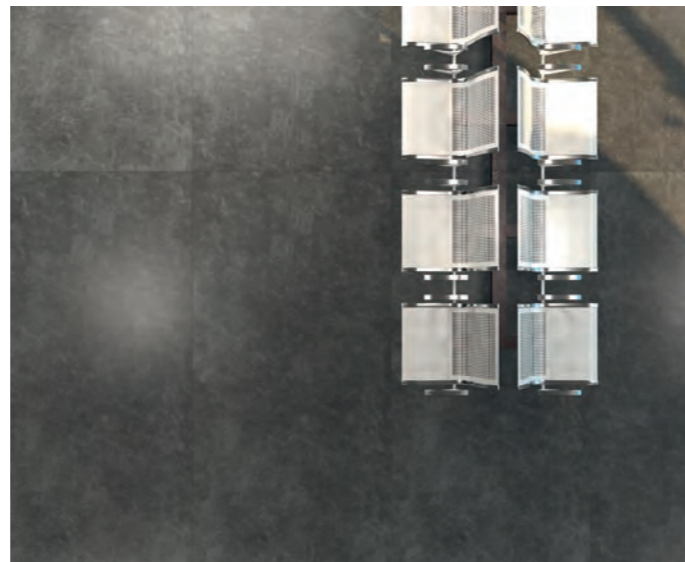

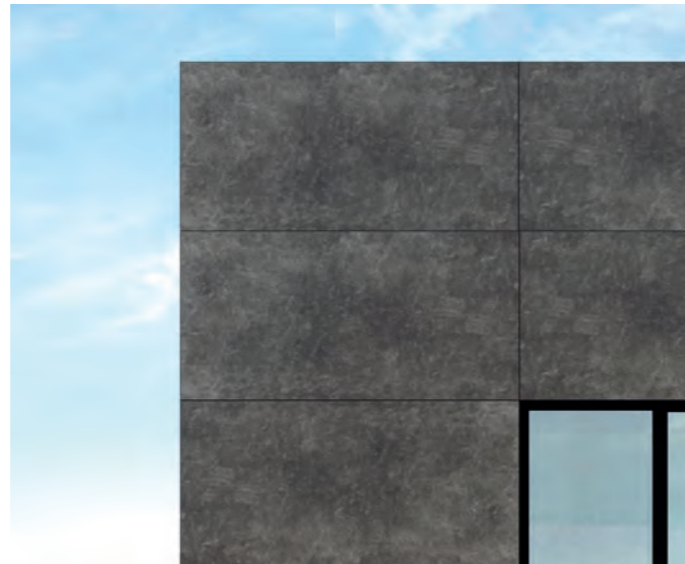

Un producto llamado a revolucionar el sector y a ofrecer nuevas posibilidades nunca vistas para el interiorismo y la arquitectura. Las láminas porcelánicas B|Plus se producen en 6 y 7 mm. de espesor y en formatos 240x120 cm. y 260x120 cm. Nuestro compromiso: conseguir un producto de las mejores prestaciones técnicas que sea accesible para los diferentes mercados.

La versatilidad de las láminas B|Plus permite crear espacios sin límites y aportar nuevas soluciones para la arquitectura y el diseño de interiores.

B|Plus, a bet for the porcelain of large format and thin thickness.

A product called to revolutionize the sector and offer new possibilities never seen for interior design and architecture. B|Plus porcelain sheets are produced in 6- and 7-mm. thickness and 240x120 cm. and 260x120 cm. formats. Our commitment: to achieve a product of the best technical performance that is accessible to different markets.

The versatility of the B|Plus sheets allows creating spaces without limits and providing new solutions for architecture and interior design.

El uso de la cerámica ya no se limita a cocinas y baños sino que gracias a su variedad gráfica y cromática llega a todo tipo de espacios.

Para dar respuesta a estas necesidades la oferta de piezas cerámicas de Baldocer es amplia y para ahondar aún más en la versatilidad de este material las colecciones se completan con colores y decorados.

Die Verwendung von Keramik beschränkt sich nicht nur auf Küchen und Bäder, sondern erreicht dank ihrer grafischen und farblichen Vielfalt alle Arten von Räumen.

Um auf diese Bedürfnisse zu antworten, bietet Baldocer eine breite Palette an keramischen Elementen an. Um die Vielfältigkeit dieser Kollektionen zu vertiefen, werden sie mit weiteren Farben und Dekoren vervollständigt.

The use of ceramics is not limited to kitchens and bathrooms; thanks to its graphic and chromatic variety it reaches all types of spaces.

In order to respond to these needs, Baldocer offers a wide range of ceramic pieces, and to further amplify the versatility of this material, the collections are completed with colors and decorations

L'utilisation de la céramique ne se limite pas aux cuisines et aux salles de bains, mais grâce à sa variété graphique et chromatique, elle atteint tous les types d'espaces.

L'offre de carreaux céramiques de Baldocer est ample afin de répondre aux besoins et les collections sont complétées avec des couleurs et des décors.

SIMBOLOGÍA / SYMBOLS

Escala de destonificación del color Shade variation program scale

V1 ASPECTO UNIFORME / V1 UNIFORM APPAREANCE

Todas la piezas de la misma partida son similares.
All the pieces from the same production run are similar.

V2 DESTONIFICADO LIGERO / V2 SHADE VARIATION:LOW

Diferencias claramente perceptibles en textura y/o
diseño pero con colores similares.
*Clearly distinguishable differences in texture and/or
pattern but with similar colors.*

V3 DESTONIFICADO MEDIO / V3 SHADE VARIATION:MEDIUM

La intensidad del color de cada pieza puede variar
significativamente, aunque los colores presentes en una
baldosa serán representativos de los colores que cabe
esperar en el resto de baldosas.

*While the colors present on a single piece of tile will be
indicative of the colors to be expected on other tiles, the
amount of color on each piece will vary significantly.*

V4 MUY DESTONIFICADO / V4 SHADE VARIATION:HIGH

Diferencias de color aleatorias entre unas baldosas y
otras, de manera que cada una de ellas puede tener
colores completamente distintos de las demás. De este
modo, la colocación final será única.

*Random color differences from tile to tile, so that one
tile may have totally different colors from that on other
tiles. Thus, the final installation will be unique.*

NORMAS DE MANTENIMIENTO Y LIMPIEZA / CLEANNING AND MAINTENANCE

Limpieza final de obra

Después de la colocación es fundamental realizar una buena limpieza con el fin de eliminar residuos de junta y en general suciedad de la obra. Para esta operación recomendamos el empleo de un detergente de acción ligeramente ácida que no despidan humos tóxicos y respete las juntas, el material y el usuario, como FILADETERDEK. En el caso de material colocado con junta epoxi o en base resina, se aconseja realizar la limpieza final de obra con un limpiador específico de residuos epoxi, como FILACR10.

Mantenimiento

Para un buen mantenimiento del pavimento se aconseja el empleo de un detergente neutro con alto poder limpiador como FILACLEANER. En los casos de suciedad intensa e incrustada acumulada en el tiempo, se aconseja consultar el esquema a continuación para encontrar el producto Fila ideal para cada situación.

Cleaning after laying

We suggest a good initial cleaning after the laying on the floor or wall, this is very important for removing residual grouting and the normal dirt coming from the building works.

We suggest the use of our product FILADETERDEK, that is a lightly acid product that doesn't emit fumes that are harmful for the user and that can attack joints.

In case of material layed with epoxy or resinous grouting, we recommend to clean after laying with our specific detergent FILACR10.

Regular maintenance

For a good cleaning of the floor we suggest the use of our product FILACLEANER it's a natural detergent with a high cleaning power. In case of strong dirty and encrusted by the time, we recommend to consult the following scheme to find the perfect solution to every situation.

| Tipo de suciedad incrustada | Producto Fila a utilizar |
|--|--------------------------|
| Residuos de cemento de colocación, residuos calcáreos, rayas metales, depósitos de óxidos | DETERDEK |
| Residuos de junta epoxi, vitrificada, resinosa | FILACR10 |
| Suciedad orgánica ligera (limpieza diaria) | FILACLEANER |
| Suciedad orgánica intensa (comidas, grasas, aceites), residuos de detergentes y jabones, goma, neumáticos, tintes, rotulador, pintura plástica | FILAPS87 |
| Pintadas de grafitis, spray acrílicos, alquídicos y nitro sintéticos | FILANOPAINT STAR |
| Verdín, algas, musgos, líquenes y ennegrecidos en exteriores | FILAALGAE NET |
| Moho interior por condensación | FILAACTIVE 1 |
| Residuos de silicona, cera de velas, resinas árboles, residuos cinta adhesiva, residuos de espuma poliuretánica, residuos de pegamentos, etc. | FILAZERO SIL |

| Type of dirty | Das richtige Product |
|---|----------------------|
| Zement, Kalkstein, metal tracer, rust | DETERDEK |
| Residuals, stains and halos of epoxi joints | FILACR10 |
| Greasy, drinks, food, tire marks, colors, marker, etc. | FILAPS87 |
| Grafitis | FILANOPAINT STAR |
| Silicone residues, glue, wax candel, adhesive tape residues | FILAZERO SIL |

MANUAL TÉCNICO / TECHNICAL GUIDE MANUEL TECHNIQUE TECHNISCHES HANDBUCH

ES

Recomendaciones para el mantenimiento de los materiales pulidos.

El material pulido tiene mayor predisposición a la aparición de manchas debido a los pequeños micro-poros que se originan durante el proceso de pulido. Asimismo, los pulidos no toleran los ácidos y álcalis de alta concentración tales como el ácido clorhídrico, ácido láctico e hidróxido potásico. Por lo tanto, se recomienda para su mantenimiento, el uso de ácidos de baja concentración o productos domésticos de limpieza.

Cuidados a seguir durante la construcción.

Nuestros productos cerámicos se pueden considerar acabados finales en la construcción. Se recomienda colocarlos sólo cuando el resto de los trabajos constructivos hayan finalizado: estructuras, mampostería, solados, techos, instalaciones..., en especial los productos porcelánicos para suelos. De este modo se minimizan los daños que pueda experimentar el producto cerámico por haber sido colocado demasiado pronto.

Cuando los productos porcelánicos son colocados antes de finalizar la construcción, se recomienda darle una adecuada protección al pavimento con cartón, capa de serrín u otro producto que lo proteja.

DE

Verwendungs- und Pflegeempfehlung für polierte Fliesen.

Das polierte Material neigt zur Fleckenbildung aufgrund der Mikroporen, welche während des Polierprozesses entstehen. Die Politur verträgt keine hochkonzentrierten Säuren und Laugen wie beispielsweise Salzsäure, Milchsäure und Kaliumhydroxid. Aus diesem Grund wird die Verwendung von schwachen Säuren und Haushaltsprodukten zur Pflege empfohlen.

Während der Bauarbeiten zu beachten.

Man kann unsere Keramikfliesen als Abschluss einer Bauphase betrachten. Wir empfehlen, die Fliesen erst zu verlegen, wenn der Rest der Arbeiten abgeschlossen ist: strukturelle Arbeiten, Mauerwerk, Fußboden, Decken, Installationsarbeiten, ..., insbesondere bei Bodenfliesen. Dadurch werden Schäden bei einer zu frühzeitigen Verlegung der Fliesen vermieden.

Wenn die Fliesen vor Abschluss der Bauarbeiten verlegt werden, empfehlen wir, den Boden mit Karton oder einem anderen entsprechenden Schutz zu bedecken.

EN

Polished tiles recommendations of use and maintenance.

The polished material has a greater predisposition to the appearance of stains due to the small micro-pores that originate during the polishing process. Likewise, polishes do not tolerate high concentration acids and alkalis such as hydrochloric acid, lactic acid and potassium hydroxide. Therefore, the use of low concentration acids or household products is recommended for maintenance.

Care to follow during construction.

Our ceramic products should be considered as a construction finishing product. Its installation is only recommended when the rest of construction works have been already finalised: structures, masonry, flooring, ceiling, internal systems..., especially for the porcelain floor tiles. In this way potential damages that may undergo the ceramic product will be minimise for being installed to early.

When the ceramic products are installed before the construction is finalised, is highly recommended to give the floor a proper protection, either using cardboard, a layer of sawdust or any other product that protects it.

FR

Recommandations pour l'entretien des matériaux polis.

Les matériaux polis sont plus sensibles à l'apparition de tâches due aux petits micropores survenant pendant le processus de polissage. De même, ils ne tolèrent pas les acides et alcalins de concentration élevées tel que l'acide chlorhydrique, l'acide lactique et de l'hydroxyde de potassium. Par conséquent, il est recommandé pour l'entretien, l'utilisation d'acides à faible concentration ou des produits de nettoyage ménagers.

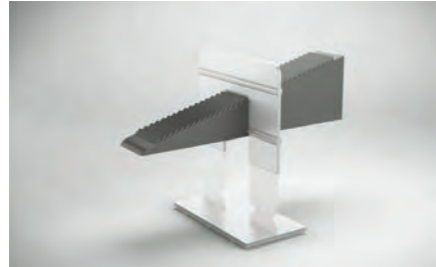

Precautions à prendre durant la construction.

Nos produits céramiques peuvent être considérés comme la touche finale dans le processus de la construction. Nous recommandons de les installer seulement quand le reste des travaux constructifs ont été réalisés : structures, maçonnerie, chape, plafonds, installations..., en particulier les produits de grès cérame pour sol. Nous éviterons de cette façon les éventuels dégâts pouvant affecter le produit céramique dès à son installation prématurée.

Lorsque les produits céramiques sont installés avant de terminer la construction, nous recommandons de les protéger convenablement avec un carton, une couche de sciure ou tout autre produit pouvant les protéger.

SISTEMA DE NIVELACIÓN / LEVELLING SYSTEM

Autonivela la altura de Pavimentos y Revestimientos.
Get proper levelling between pieces to avoid air gaps on floor and wall tiles.

Fácil fijación y extracción de la prótesis.
Easy fixing and levelling of prosthesis.

Sistema que mejora y facilita la colocación de cerámica.
Easy System that improves the installation of tiles.

Consigue la nivelación de piezas deseada con un perfecto acabado.
Get an excellent levelling of pieces with a perfect finishing.

ESPECIFICACIONES POR USO / USE SPECIFICATIONS

GRUPO I

Resistencia débil a la abrasión. Los productos abrasivos deben ser eliminados.
Recomendado: baños y dormitorios de viviendas privadas. Zonas de tránsito y calzado suave.

GRUPO II

Resistencia débil a la abrasión.
Recomendado: baños y habitaciones de viviendas privadas, excepto oficinas. Zonas de tránsito moderado con calzado suave.

GRUPO III

Resistencia media a la abrasión.
Recomendado: todas las habitaciones de viviendas privadas. Zonas de tránsito regular con calzado normal.

GRUPO IV

Resistencia relativamente fuerte a la abrasión.
Recomendado: para todas las habitaciones de una vivienda, incluido cocinas, así como en lugares públicos. Zonas de tránsito medio-intenso con calzado normal.

GRUPO V - CLASS V

Resistencia fuerte a la abrasión.
Recomendado: todos los lugares públicos y privados. Zonas de tránsito intenso con calzado normal.

Esta clasificación es válida para la aplicación en condiciones normales. Téngase en cuenta el tipo de calzado, tipo de tráfico y métodos de limpieza desaconsejados.
El pavimento debe ser protegido ante el rayado y la suciedad en la entrada de edificios a través de algún medio de protección.

CLASS I

Weak resistance to abrasion. Abrasive products should be removed.
Recommended for: private bedrooms and bathrooms and low transit areas with soft footwear.

CLASS II

Weak resistance to abrasion.
Recommended for: private bathrooms and private rooms except offices and moderate transit areas with soft footwear.

CLASS III

Medium resistance to abrasion.
Recommended for: any private room and regular transit areas with regular footwear.

CLASS IV

Medium to high resistance to abrasion
Recommended for: any private room including kitchens, public areas and medium to high transit areas with regular footwear.

CLASS V

High resistance to abrasion.
Recommended for: any private and public areas and high transit areas with regular footwear.

This classification is valid for the given applications in normal conditions. Consideration should be given to the footwear, type of traffic and cleaning methods expected and the floors should be adequately protected against scratching dirt at the entrances to buildings by interposing footwear clering devices.

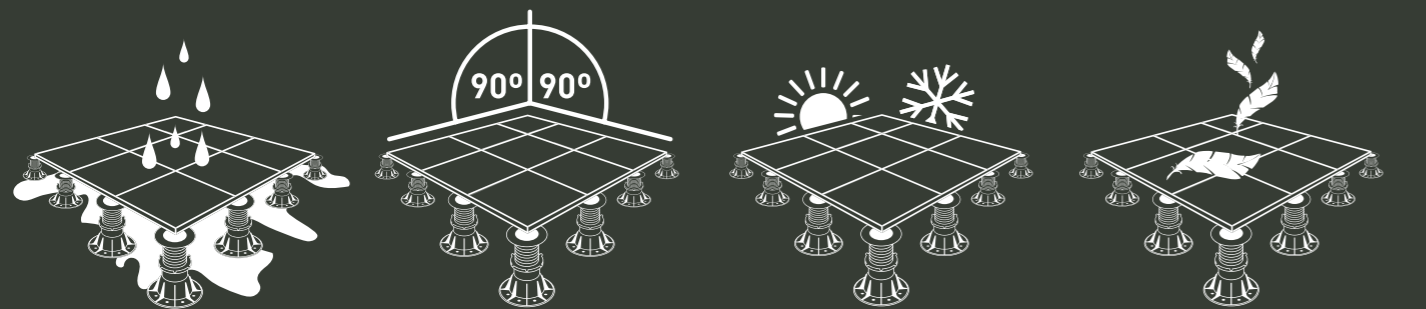

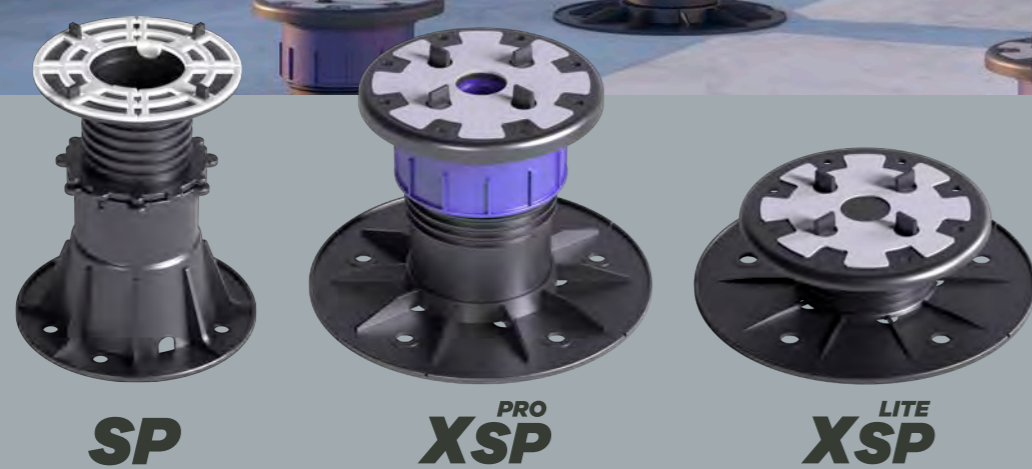

SOPORTES Pavimento Elevado

Los soportes Peygran para exterior son una solución para proyectos en los que debemos utilizar un pavimento flotante, técnico, sobreelevado o registrable.

Son la mejor alternativa a los métodos tradicionales de construcción en este tipo de proyectos, para aligerar peso y evitar barreras arquitectónicas. Permiten acabados de gran calidad, ahorrando trabajo y facilitando el mantenimiento posterior de las instalaciones.

Peygran outdoor plots are the ideal solution for projects in which wood, technical, raised or wpc floating platforms are installed.

They are an excellent alternative to other traditional methods, to lighten weight and avoid architectural barriers. They allow high quality finishes, they save work and ease the maintenance of the facilities.

- 1 Perfecta evacuación de agua**
Perfect water draining
- 2 Completa planeidad del pavimento**
Complete pavement flatness
- 3 Óptimo aislamiento térmico**
Optimal thermic isolation
- 4 Cubiertas ligeras, montaje en seco**
Light coverage. Dry mounting

Los productos aquí reflejados son una mercadería que puede estar sujeta a incrementos de precios por parte del proveedor en cualquier momento. En caso de modificación de precios, se aplicarán los que estén vigentes en el momento que el pedido sea aceptado por Peygran. Los precios reflejados son precios netos, no están incluidos ni el impuesto del valor añadido, IVA, ni tasas, ni otros impuestos de cualquier clase que pudieran ser aplicados a la venta.

The products reflected here are merchandise that may be subject to price increases by the supplier at any time. In case of price changes, those in force at the time the order is accepted by Peygran will apply. The prices shown are net prices, they do not include value added tax, VAT, fees, or other taxes of any kind that could be applied to the sale.

XSP es la evolución del Plot, su principal ventaja es su base autonivelante, dispone de Llave de nivelación, que permite reajustar la altura una vez cerrada la instalación y bloquear la altura de los Plots de forma definitiva.

XSP is the evolution of the Plot, its main advantage is its self-leveling base, it has a leveling key, which allows you to reset the height once the installation is closed and block the height of the Plots permanently.
